

6

Air Quality Health Impacts:

Reduce incidence of health issues related to air quality by providing or expanding targeted programs—such as expansion of the breathmobile, in-home health consultations, and air filters for sensitive receptors.

Actions

6.1 Assess health conditions in Bloomington

At the request of the Bloomington MAC, the County Department of Public Health will assess health conditions related to air quality and potential interventions for Bloomington.

Champion: Bloomington MAC (with support from the Department of Public Health and South Coast Air Quality Management District)

Time Required: 1 month

Estimated Cost: No new additional cost; use of existing budgeted funds

6.2 Conduct an air quality community workshop

The Department of Public Health will present the results at a Bloomington MAC meeting and collect additional public concerns and priorities regarding air quality and health. The Department of Public Health will facilitate a second workshop to generate community consensus on preferred interventions, explain funding options, and to identify next steps.

Champion: Bloomington MAC or a volunteer group or person identified by the community (with support from the Department of Public Health and South Coast Air Quality Management District)

Time Required: 3-6 months

Estimated Cost: No new additional cost; use of existing budgeted funds
